

10 Series

Standard Features

Model 10A

- Total automatic cycle 72-second cycle
- Automatic and manual controls
- Electric wash tank heat with low water protection
- Incoming water pressure regulator
- External vacuum breaker
- Exclusive counter rotating wash arms provide superior wash action
- Round design distributes even wash action giving superior results
- Heavy duty construction for years of reliable service
- 304 stainless steel
- Must be connected to a 180°F minimum potable water source for sanitizing rinse

Model 10AB

All the standard features listed for the Model 10A plus a 6.5 KW built-in booster heater. The booster heater is sized to raise incoming water 40°F to 50°F and is thermostatically controlled to maintain proper sanitizing temperature. The Model 10AB must be connected to a 140°F minimum potable water source to guarantee proper sanitizing rinse.

Model 10APRB

All the standard features listed for a Model 10AB plus a 1/2 HP pump to ensure proper flow pressure during the rinse cycle. The Model 10APRB is designed for areas of low and/or fluctuating water pressure and is highly recommended for facilities on well water systems and anywhere flow pressure is below 15 PSI. The Model 10APRB must be connected to a 140°F minimum potable water source to guarantee proper sanitizing rinse.

Power/Connections

Electrical Rating

Wash Pump Motor Horsepower	1/2
Rinse Pump Motor Horsepower (APRB only)	1/2
Electric Wash KW	0.75
Electric Wash Rinse KW	6.5

Water Requirements

	Inlet Temperature °F
Model 10A	180
Model 10AB	140
Model 10APRB	140
Gallons per Hour	58

Short Form Specifications

Model 10A – Item No. _____

Unit shall be Jackson Model 10A round hot water sanitizing dishmachine. Electrical characteristics to be ___ volts / 60 cycles / 1 phase operation with a 72 second automatic cycle using 58 gallons of 180° F. final rinse water per hour. Stainless steel construction to include hood, frame, wash tank, and adjustable feet. A 1/2 HP motor mounted to a cast iron pump with a stainless steel impeller shall be mounted to the machine frame. As standard the unit shall include:

- Single point connections for all utilities
- Side mounted control box with electro-mechanical components and a delimiting switch as standard.
- Automatic and manual controls
- Manual fill
- Built-in water pressure regulator.

Unit shall be NSF Certified and UL Listed.

Stainless steel construction to include hood, frame, wash tank, and adjustable feet. A 1/2 HP motor mounted to a cast iron pump with a cast iron impeller shall be mounted to the machine frame. As standard the unit shall include:

- Built-in 6.5 KW booster heater
- 1/2 HP pump to increase the final rinse flow pressure
- Single point connections for all utilities
- Side mounted control box with electro-mechanical components and a delimiting switch as standard.
- Automatic and manual controls
- Manual fill
- Built-in water pressure regulator.

Unit shall be NSF Certified and UL Listed.
