RT-2AR "Adjustable Heat" Conveyor Toaster

At last...the one toaster that does everything you want a toaster to do.

Model RT-2AR Shown

The fully adjustable toaster

The RT-2AR "Adjustable Heat" toaster features fully adjustable conveyor speed and fully adjustable upper and lower heating systems. The combinations are nearly endless – making this the one toaster you need for all your bread products.

Fast bread toasting

The RT-2AR toaster can produce up to 750 slices of golden brown toast each hour. The heating elements reach operating temperature quickly for the first toast order and the conveyor design makes operation nearly automatic.

Croissants as croissants should be

A croissant is perfect when it is served warm. It should be golden brown, crisp and flaky on the outside and slightly moist on the inside. Only Savory has designed a toaster to reconstitute a croissant just that way.

More versatility

In addition to bread and croissants, the RT-2AR toasts products such as English muffins, bagels, rye bread, whole wheat bread, French and Italian breads, Texas Toast, rolls, buns, pita bread, frozen waffles and more – with consistent results.

More Savory features

One or two side of product can be toasted with only one pass through the conveyor. The extra-high product-entry opening allows for thicker bread products. The RT-2AR toaster is built with the Savory tradition of quality.

Productivity information

(depending upon voltage and bread dryness)

- RT-2AR – 650-750 slices/hour
