8" pizzas	12
10" pizzas	8
12" pizzas	6

OPTIONAL ACCESSORIES

- Stainless Steel Oven Tool Set (with stainless steel hangers)
- Stack-Mounted Exhaust Fan
- Custom Oven Mounted Exhaust Hood

Originally designed as a high production flat bread oven, The Dual Burner Bistro 4355 is also well suited for many other stone hearth cooking applications. The Bistro 4355 features a standard door opening 24 inches wide x 7.5 inches high. The cooking surface is 24 inches wide, and 44 inches deep, resulting in 7.3 square feet of usable deck space.

The dense, high temperature ceramic formulation of which the 500-pound, monolithic, cast-ceramic floor and the 725-pound, monolithic dome are cast creates a "deep heat sink" within the chamber of the oven. The hearth and dome are connected by a carefully tensioned stainless steel exoskeleton, which ensures structural integrity and long life. The oven sits on a heavy-duty frame. A stainless steel storage compartment is optional and can be provided in the support frame.

The ceramic interior is heated by two powerful, independently adjustable radiant burners located on each side of the oven chamber. Each burner is controlled exclusively by the chef, the heat distribution in the oven can be adjusted to meet the needs of a variety of menu items. The Bistro can be configured to burn either Natural Gas or Propane - *gas type should be specified at time of order.*

The Bistro arrives fully assembled and ready for installation. The oven can be disassembled on-site to fit through a 32-inch doorway. See installation manual for instructions.

The Bistro vents through a 10-inch O.D. flue collar located above the doorway. Our gas ovens can be direct connected to a power-ventilated, grease-rated chimney or can be vented with a Listed Type 1 exhaust hood or one constructed in accordance with NFPA 96 and all relevant local and national codes. The oven must be vented in accordance with all relevant local and national codes and in a manner acceptable to the authority having jurisdiction.
