

Wood Stone

Oven shown with optional stainless steel mantle.

MT. CHUCKANUT 4'

Stone Hearth Oven

Job Name

Model WS-MS-4-RFG-W

Item#

Fuel Type **Gas-Fired / Wood Optional**

Hearth Capacity

8" pizzas	8-10
10" pizzas	5-6
12" pizzas	4
16" pizzas	1-2

Assuming 5-minute cook times, the approximate maximum hourly production capacity can be calculated by multiplying the above numbers by 12.

Note: Highlighted capacities are considered an operational challenge.

OPTIONAL ACCESSORIES

- Doorway and Service Panel Extensions
- Stainless Steel or Black Granite Mantles
- Stainless Steel Oven Tools
- Custom Finishes
- Exhaust Fan
- Exhaust Hood
- Custom Wood Burning Accessories

The Mt. Chuckanut Radiant Flame, Gas-Fired / Wood Optional oven features a standard door opening 20 inches wide x 10 inches high. The inside diameter of the oven floor is 37 inches, resulting in a 7-square-foot cooking surface. The oven is ETL Listed for installation with a 1-inch side clearance to combustible building materials.

The dense, high-temperature ceramic formulation of which the hearth and dome are cast creates a "deep heat sink" within the chamber of the oven. The oven is heated by an easily adjustable (68,000-BTU max.) wall of radiant flame located at the rear of the cooking chamber. The user also has the option of building a small wood fire on either side of the cooking chamber for additional ambience and flavor.

The 650-pound, monolithic, 4-inch thick cast-ceramic floor sits on 4 inches of rigid insulation. The 700-pound, monolithic dome is cast to a thickness of at least 4 inches. The hearth and dome are connected and supported by a carefully tensioned steel exoskeleton, which ensures structural integrity and long life. The body of the oven rests on a 12-gauge steel pan bolted to a heavy-duty, 3-inch angle iron stand. The oven is wrapped with at least 2 inches of spun ceramic fiber insulation and enclosed (top and sides) with 16-gauge galvanized steel. The oven arrives completely assembled and ready to set in place.

The oven vents through an 8-inch O.D. flue collar located above the doorway. The Mt. Chuckanut can be direct connected to a power-ventilated, grease-rated chimney or can be vented with a Listed Type 1 exhaust hood, or one constructed in accordance with NFPA 96 and all relevant local and national codes. The oven must be vented as a solid fuel appliance, in accordance with all relevant local and national codes, and in a manner acceptable to the authority having jurisdiction.

Wood Stone's Radiant Flame, Gas-Fired ovens can be manufactured to be fully and easily convertible to Dual Burner Gas-Fired ovens (this must be specified at time of order).
